DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1, 4-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Fowell [6,135,389].

Fowell discloses a service area or service region having an inclination or elevation angle relative to the horizon and a satellite having an inclined eccentric geosynchronous orbit with respect to the earth. As recognized in the art, a geostationary orbit is a circular orbit that lies in the plane of the equator, with an orbit period equal to the earth's rotation period. A geostationary orbit is a geosynchronous orbit with zero eccentricity and zero inclination. By contrast, a geosynchronous orbit is an orbit that has the same period as the earth's rotation, but may have nonzero eccentricity and inclination. Fowell also discloses an operating arc that lies over the service area or region, wherein the satellite is operating on the operating arc. See columns 1 and 2.

Allowable Subject Matter

3. Claims 8-11, 13-18 are allowed over the prior art of record.

Response to Amendment

4. The arguments filed on April 27, 2001 have been entered and carefully considered by the examiner.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the degree of elevation) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

As admitted by applicant, the degree of elevation is not recited in the rejected claims. If such degree of elevation (e.g. 50 degrees) is what distinguishes the present claimed invention from the prior art, applicant is suggested to incorporate such into the claims to define over the prior art.

Upon reconsidering the claimed invention against the applied prior art, it ^{is} still the examiner's position that the Fowell patent renders the claims (1, 4-7) unpatentable. As the claims are presented, they remain rejected. Accordingly, this office action is made final.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3661

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
